

Tractor Technical Manual Publications List

The Minneapolis Moline Collectors Directors funded this project to make the information available on the Web site. The print copies from the Floyd County Museum were not available electronically, so all data was entered manually into an excel file – over 6,000 lines of data! The directors hope that making this information more easily accessible will help those needing such detail. Lead on the project is Mike Verhulst.

Tractor Technical Manuals are available from the Floyd County Museum, Charles City, Iowa
